

Instructions

Contents:

Instructions • a gaming board • 6 counters • 1 dice • 60 cards • answer key

Digital Brainiacs board game can be played by 2-6 players. In each turn, all players throw a dice to move their counters. Each space from 1 to 60 has a different meaning described on game cards. If a player answers a question correctly or meets a challenge, they move one space forward. Being on the next space the player does not draw the card in that turn but waits for the next round.

There are five kinds of spaces:

AN ORDINARY SPACE

A player on that space follows instructions on a card assigned to that space.

A CHALLENGE SPACE

A player on that space is given a task /challenge from a player to their right. The challenge must be related to Internet safety topics.

TRUE OR FALSE

An answer must be given. If the answer is correct, the player moves to the next space, otherwise, they stay where they are. Another player reads the correct answer from the game's answer key. do gry listy.

AN OPEN QUESTION

The rules above apply.

A MULTIPLE-CHOICE QUESTION

The rules above apply.

Sample tasks for the challenge space:

- You have 10 seconds to define the word "Internet".
- Describe what you do when someone asks you to send erotic images. What steps do you take to ensure that you are safe online?
- You have two minutes to delete an old post or an image from your selected social media profile.
- You have one minute to come up with an account password that is hard to guess being a combination of letters, numbers, and symbols.
- You have 30 seconds to define a term, for example, phishing, cyberbullying, or cookies.
- Give three steps you can take to secure your device against cyberattacks.

Important!

If a player enters the space where a question has already been answered, they move one space further and answer a question from that space.

The player who first reaches the finish space is the winner.

The Do It Yourself version

After the game please try a version with game cards designed by you. Visit www.makeitclear.edu.pl with blank cards ready for printing. Create your own challenges and see if you can handle the topic of online security.
